

Hybrid Sound

TiGLON

Hyper Sound Solution

Magnesium Pole (cross section)
diameter: 32mm

Four each shelf side is cut out for easy clearance of cables, so you can set the rack to the wall with no margin.

By bordering and gluing each Russian birch ply, high intensity and high level of suspension suppression has been achieved.

The audio rack made from magnesium **MAGNESIA**

World first dual cylindrical magnesium poles employed in an audio rack. Extraordinary intensity and absorption of vibrations have been attained. It also deletes unnecessary vibrations and resonance for ideal sound stage by means of micro-fine sands filled inside the dual cylinders. Shelves are Russian birch wood carefully selected to ensure high airtightness and water resistance. Hybrid structure of metal and natural wood shakes up your audio system. Enjoy natural sound with magnesium rack MAGNESIA.
